What is the favorite part of your job?

Seeing a beam of happiness and confidence on the faces of my patients is extremely gratifying. I sincerely enjoy helping my patients by offering them the best available technologies and the best of my artistry.

What are your most important beauty tips?

Avoid sunburns, sleep well, eat healthy foods, don't smoke, avoid stress and be confident in yourself.

Artist at Heart

Dr. Shalini Gupta has always felt like an artist at heart. "I have always enjoyed finding and creating beauty in life. I am extremely fortunate to be in a profession where I can create beauty daily in the lives of my patients," she says.

Dr. Gupta's practice, The Dermatology, Laser & Vein Center, is a full-service dermatology and cosmetic practice with services ranging from taking care of dermatological skin diseases to addressing client's cosmetic concerns. "We are grounded solidly in skin expertise, dedicated to helping patients achieve great results using the latest technology and procedures available," says Dr. Gupta.

Dr. Gupta, who grew up in Cincinnati, earned her bachelor's degree from Miami University before earning her medical degree from Harvard Medical School and participating in a number of prestigious internships and fellowships. "We have the most extensive laser expertise and experience in our area and are the leader in new advancements in the field," Dr. Gupta says. Today, she combines that significant expertise to make patients look, and feel, their best. "We strive to bring out the best features in our patients, allowing them to feel their best with confidence" she says. The results are lasting relationships with patients based on trust, respect and compassion.

Advanced Techniques, Natural Look

Dr. Gupta is the first and only physician in Cincinnati to offer a fresh perspective on skin resurfacing with the ProFractional procedure, which dramatically reduces wrinkles, sun damage and scars by creating the tiniest of laser healing spots over the skin. The recovery time is minimal compared to more aggressive skin resurfacing methods, but the results speak for themselves.

Dr. Gupta continues to lead in the Smartlipo laser body sculpting procedure. She also uses Vaser, Velashape and Zerona to provide a complete body shaping package, which allows for the best in fat and cellulite removal with the least amount of trauma to the body.

Dr. Gupta believes that a procedure done well should not look like a procedure, it should just look good. "Family and friends of our patients will often comment that they look great, but can't put their finger on what the change is," she says. The Dermatology, Laser & Vein Center uses advanced techniques such as ProFractional, Fraxel, Thermage and SkinTyte to restore sun damaged, worn skin. Instead of cutting away excess skin and fat as with traditional plastic surgery, which often leaves old skin looking tight, Dr. Gupta uses newly developed filler agents to help restore facial volume and youthful features.
